

# DATASECURE

## Datasecure:

- Data storage and back up
- Never lose your data

- Data is stored independent of your PC
- Data storage of up to  $5E10^8$  datapoints
- "Log-on" any time with your PC to stream available data
- Password protection of data possible

The Ivium Datasecure module stores data from your entire on-going experiment, **independent from your PC**. Even if your computer fails, your data will be saved on the Datasecure module. **Your data will never be lost**. You can "log-on" at any time to stream the available data to your PC.

Additionally, the Datasecure module also keeps a back-up of your previous experiment.

## Connection:

- WI-FI
- LAN
- USB
- Remote/direct

- **Wireless connection** → access anywhere: ideal for connection in fume hood or glove box
- **Direct (hard-wired) connection** also possible
- For single Ivium potentiostats and for Ivium-n-Stat with full complement of channels
- Password protected connection possible

The Ivium Datasecure module is the connection link between the Ivium potentiostat and your computer. The Datasecure can connect directly to your WI-FI network to be **accessed from anywhere** in the WI-FI covered area.

Alternatively the Datasecure can also **create its own hotspot**. In this way password protected connection is possible.

Direct (hard-wired) connection to your computer is also possible via both LAN and USB.
