

Ivium Technologies is looking for a:

Software developer

High tech developer of analysis software and user interface

Ivium Technologies is a young, fast growing high-tech company. We develop and sell electronic instrumentation for electrochemical research. Our customers are universities and R&D laboratories worldwide. Our instruments are used in the development of new technology, such as batteries, fuel cells, solar cells and medical analysis equipment.

Your job

You will be working in a small team and participate in the complete development cycle from idea to end-product. Your primary task is the design and further development of desktop applications, from the user interface to the hardware control and data-analysis.

We ask

You are independent, creative and results orientated. You can operate on an academic level, and you have experience with the programming of desktop applications.

Mandatory Skills

- Minimum of 2-3 years of experience working in professional software development
- Proficiency in C#
- Experience with Microsoft .NET
- Experience with Microsoft Visual Studio
- Experience with SQL Databases

Preferred Skills

- Experience with Microsoft Windows Forms .NET
- Experience with issue tracking systems and git-based source control systems
- Experience with setting up software tests

We offer

- A full-time job with variety, in a dynamic growing company
- Part-time employment is also a possibility
- Attractive salary, and a package with modern employment conditions
